siMetrix

**THE NEW ASSEMBLY SYSTEM
BY SIKLA.**

An overview of all parts 

ENGINEERING EXCELLENCE

siMetrix - the missing link!

Patented 1-2-3 principle: design and install with one type of screw and two different parts in three dimensions

Modular and flexible due to identical geometries on all faces

Quick installation thanks to an innovative click system and One-Screw Technology

Adapts to existing primary building structures such as walls, ceilings and traditional steel beams

The perfect choice for space saving thanks to its compact design

Closes the gap between Pressix 41 strut system and the siFramo F80

INTEGRATED PROJECT PLANNING

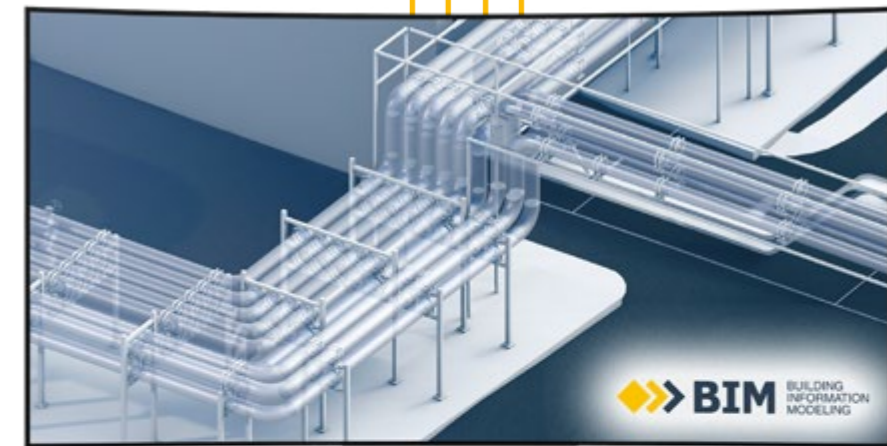

siMetrix from planning to completion!

Now available on all SiCAD4 software tools to simplify BIM projects

Reduce time and costs with efficient planning

Simplified planning thanks to fewer parts, modular components and clash-free modelling

Available on Sikla CAD libraries

Compatible with:

SiCAD 4 E3D SiCAD 4 Plant3D SiCAD 4 S3D SiCAD 4 REVIT

A CLASS OF ITS OWN

Reliable and flexible!

This system offers flexibility for complex, three-dimensional structures by connecting all components with one screw only. The newly developed and patented system with One-Screw Technology.
